① Write a Java Program which would take two values through Command line argument and print the Sum of the two values

```java
import java.io.*;
public class Addition
{
    public static void main (String args[]) throws IOException
    {
        BufferedReader br = new BufferedReader (new
                            InputStreamReader (System.in))
        System.out.println (" Enter the valuer of a ");
        int a = Integer.parseInt (br.readline());
        System.out.println (" Enter the value of b ");
        int b = Integer.parseInt( br.readline());
        int sum = a+b;
        System.out.println (" Addition of two numbers is "
                            + sum);
    }
}
```
